# Presentation

This document contains a brief guide to the portal **AIDA: Customs Tariff for integrated use** (<https://aidaonline7.agenziaadoganemonopoli.gov.it/nsitaricinternet/TaricServlet>), developed by the Italian Customs and Monopolies Agency to help exporters and importers to identify the correct customs tariff for their products. The customs tariff is a 10-digit code called the **TARIC** code established by the European Commission, based on the **Combined Nomenclature**.

## Combined Nomenclature

The Combined Nomenclature is a commodity nomenclature established by regulation (EEC) n. 2658/87 of the Council of 23 July 1987, in order to satisfy both the requirements of the customs tariffs and the statistics of the foreign trade of the European Union.

The Commission shall adopt a complete version of the Combined Nomenclature **annually** by regulation. The regulation is published by 31 October in the Official Journal of the European Union and will apply from 1 January of the following year.

The first 6 digits of the Combined Nomenclature coincide with the first 6 digits of the **Harmonized System (HS)**.

## Harmonized System

The Harmonized System is an international standardized nomenclature of goods system, which classifies every single product through the use of a series

of numbers. The system is managed by the World Customs Organization (WCO), a supranational organization with over 200 members and based in Brussels.

Every 5 years, the WCO publishes a new harmonized system, cancelling or merging the codes relating to goods that are poorly marketed worldwide and introducing new codes for new goods. The most recent version of the Harmonized System is in 2017. The next version will be published in 2022.

The first 6 digits represent the basic classification, harmonized globally. Starting from the first 6 digits, each member state of the WCO (or union of states) can further subdivide the goods included in these items. The various world tariffs are therefore identical in the first 6 figures; from the seventh digit onwards they may differ.

Using this method of classification, it results, for example, that the HS 870360 customs code indicates Hybrid Plug-In Electric Cars all over the world. Instead, in the European Union's TARIC, we will find, separately classified, the new Hybrid Plug-In Electric Cars with less than 1000 cm<sup>3</sup> of displacement (TARIC code 870360 1010) and the new Hybrid Plug-In Electric Cars with more than 1000 cm<sup>3</sup> of displacement (TARIC code 870360 1090).

## Guide Contents

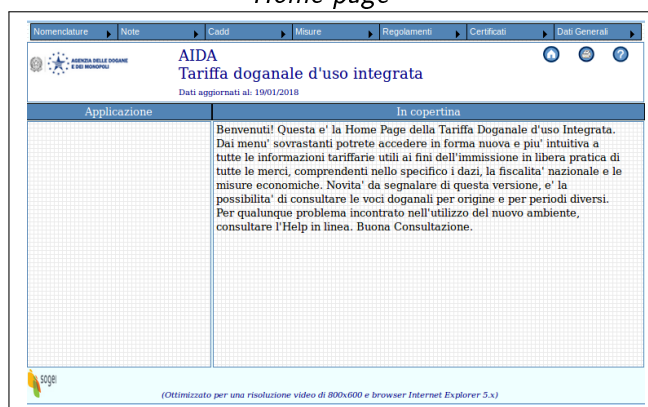

This guide describes how you can identify the TARIC rate of a product in the European Union. Once this code is identified, the first 6 digits of the TARIC code can be used as a starting point to identify the customs code of a country other than those belonging to the Union.

# Aida Portal

The AIDA portal - Customized customs tariff, managed by the Italian Customs and Monopolies Agency, is accessible at the following link: <https://aidaonline7.agenziadoganemonopoli.gov.it/nsitaricinternet/TaricServlet>.

The following figure shows the image of the HTML page displayed at this address..

Home page

At the top there is the main menu, whose first entry is Nomenclature. Selecting this item opens a sub-menu whose first entry is Taric. This entry opens an additional menu, the first three items of which are as follows:

**Visualizza / (View):** to carry out a search for the customs tariff starting from the first 4 digits of the Combined Nomenclature;

**Indice Taric / (Taric code):** to navigate in the Combined Nomenclature, starting from the Sections and Chapters;

**Ricerca per parole / (Search by keywords):** to search for a code by inserting a word in the code description.

## View

By choosing this option, the portal presents the following page.

Search by "View"

In the Nomenclature Code field it is possible to insert the first 4 digits of a Combined Nomenclature code. For example, enter the code 8703. The portal will present the structure of the Combined Nomenclature associated with this code up to the 10-digit TARIC codes. The result of this research is presented in the following figure.

Codice	Descrizione
8703	Autoveicoli da turismo ed altri autoveicoli costruiti principalmente per il trasporto di persone (diversi da quelli della voce 8702), compresi gli autoveicoli del tipo "station wagon" e le auto da corsa
8703 10	- Autoveicoli costruiti specialmente per spostarsi sulla neve; autoveicoli speciali per il trasporto di persone sui campi da golf e veicoli simili
8703 1011 00	-- Autoveicoli costruiti specialmente per spostarsi sulla neve, azionati da motore a pistone con accensione per compressione (diesel o semi-diesel) o azionati da motore a pistone con accensione a scintilla
8703 1018 00	-- altri
	- altri autoveicoli, azionati unicamente da motore a pistone alternativo con accensione a scintilla
8703 21	-- di cilindrata inferiore o uguale a 1)000)cm3
8703 2110 00	--- nuovi

By reading the description of the various codes it is possible, therefore, to identify the code of interest.

The Combined Nomenclature is organized in Chapters, represented by the first two digits. For example, the chapter **87** is the chapter that contains the codes relating to *CARS, TRACTORS, SPEEDGERS, MOTORCYCLES AND OTHER LAND VEHICLES, THEIR PARTS AND ACCESSORIES*.

## Sections

The chapters are grouped into 21 sections:

**Section I** LIVE ANIMALS AND ANIMAL PRODUCTS;

**Section II** VEGETABLE PRODUCTS;

**Section III** ANIMAL OR VEGETABLE FATS AND OILS;

**Section IV** PREPARED FOODSTUFFS, BEVERAGES AND TOBACCO;

**Section V** MINERAL PRODUCTS;

**Section VI** CHEMICAL PRODUCTS;

**Section VII** PLASTICS, RUBBER AND ARTICLES THEREOF;

**Section VIII** HIDES, SKINS AND LEATHER;

**Section IX** WOOD AND ARTICLES OF WOOD, EXCEPT FURNITURE;

**Section X** PULP OF WOOD, PAPER AND ARTICLES THEREOF;

**Section XI** TEXTILES AND TEXTILE ARTICLES;

**Section XII** FOOTWEAR AND CLOTHING ACCESSORIES;

**Section XIII** CONSTRUCTION PRODUCTS AND MATERIALS;

**Section XV** BASE METALS AND ARTICLES OF BASE METAL;

**Section XVI** MACHINERY AND MECHANICAL APPLIANCES;

**Section XVII** VEHICLES AND ASSOCIATED TRANSPORT EQUIPMENT;

**Section XVIII** PRECISION TOOLS; MUSICAL INSTRUMENTS;

**Section XIX** ARMS AND AMMUNITION; PARTS AND ACCESSORIES THEREOF;

**Section XX** FURNITURE, TOYS AND SPORTING GOODS;

**Section XXI** WORKS OF ART, COLLECTORS' PIECES AND ANTIQUES.

Section XVII, for example, groups four chapters. Chapter 86 (Trains), Chapter 87 (Motor vehicles and land vehicles), Chapter 88 (Vehicles for air and space navigation) and Chapter 89 (Means for maritime navigation).

Navigating by Section and by Chapter it is possible to identify the chapter containing the customs code of interest.

By selecting the chapter of interest, the portal presents the chapter structure in terms of 4-digit codes.

The following figure shows the 4-digit structure of Chapter 87.
