Introduction

This report is aimed at supporting **market monitor** by tracking the real time progress of the industry's international major markets, using the performances of the main competitors as a benchmark.

In particular, quarterly trends of both total imports and imports by main competitors (partner countries) are documented and presented in the following standard way:

- a line graph, showing quarterly trend in imports, in the form of an index based on 2017;
- a detailed table, showing for each quarter:
 - level of the index based on 2017, in value of imports;
 - quarterly growth rate;
 - annual growth rate;
 - cumulative growth rate, the annual change, considering the sum of the previous quarters in the current year;
 - moving average growth rate, calculated considering the change in average value of the last four quarters.

Product Description

Data contained in this report represents an aggregate of the Combined Nomenclature codes shown in the left column of the following table. In order to provide an overview of the aggregation criteria used, categories similar to that of the products included in the Ulisse Product Code are shown in the "Description" column. The "Weight %" column indicates the percentage weight of each code of the Combined Nomenclature used in the aggregation. **This weight is determined by using the European Union structure of imports .**
